November 27. 2011 Juche 100 Shaking Citadel of Capitalism: AAPSO

Pyongyang, November 27 (KCNA) -- The Afro-Asian People's Solidarity Organization (AAPSO) in a statement on Nov. 23 said that the citadel of capitalism is shaking as the capitalist crisis is expanding to a new scope.

The ruling parties were defeated in Italy, Greece, Spain and Portugal due to the debt issue, dealing a heavy blow at the whole continent of Europe, the statement said.

The impossible settlement of the debt issue is arousing big concern in the U.S., too, it noted.

Now the chief executive of a Western country is begging for funds needed for economic recovery from an African country, its former colony, it said, adding this is a miserable lot of the West.

Condemning the police for cracking down on the demonstrators against Wall Street in New York, it stressed that AAPSO is standing firm on the side of the people's movement and expresses solidarity with them in the worldwide movement against the greed of the world monopolies.

November 17. 2011 Juche 100 Rodong Sinmun on Contradiction of Capitalism

Pyongyang, November 17 (KCNA) -- The U.S. and other western countries are now suffering from such economic crises as financial and debt crisis. This is an inevitable result of the phenomenon prevalent in capitalist society where the rich get ever richer and the poor get ever poorer.

Rodong Sinmun Thursday says this in a bylined article.

The widening gap between the rich and the poor is extremely aggravating the class contradiction in capitalist society, the article says, and goes on:

The phenomenon in which the rich get ever richer and the poor get ever poorer is peculiar to exploitative society. It has become an incurable disease in capitalist society which is based on extreme individualism and liberalism and where money is almighty.

The demos taking place almost every day in capitalist countries prove absurdity of "class cooperation" and "welfare policy" much touted by monopolists and ruling quarters. They also show that such malignant evils of capitalist society as concentration of wealth into a handful of the richest persons and emergence of huge army of jobless persons have reached the extremes.

The concentration of capital and wealth into a tiny handful of forces in capitalist countries is the main cause of the economic catastrophe.

Governments and capitalists in capitalist countries at present have neither way nor plan to reduce the widening gap between the rich and the poor.

Some capitalist countries are reportedly working hard to shore up the economy and tide over the crisis of unemployment, but there can never be a fundamental solution without reform of system.

With any desperate efforts, capitalism can never escape from the present crisis.

The wider the gap between the rich and the poor becomes, the fiercer the struggle of working masses against it will grow. Finally, capitalism will go to ruin by the struggle.

Copyright (C) KOREA NEWS SERVICE(KNS) All Rights Reserved.

November 14. 2011 Juch 100 Violence Is Not Solution to Crisis of Capitalism: KCNA Commentary

Pyongyang, November 14 (KCNA) -- The way of capitalist countries countering the worldwide anti-Wall Street demos is not in accordance with common sense.

The United States, styling itself model of "freedom" and "democracy", and other capitalist countries treat with violence the protest actions of the working masses who have turned out in demonstrations for their vital rights.

In the U.S. alone, the police violently cracked down upon the protestors and took away a lot of them in Columbia Special District, Chicago, Huston, Oregon and Texas.

In Oakland a port was closed and some of the protestors were seriously wounded during the police quelling operation.

Violent repression and arrest can never be a solution to the issue as those protestors are demanding vital rights.

Support demos are taking place one after another across the country, including Los Angeles, New York, Milwaukee and Maryland in protest against the police's indiscriminate suppression.

Witnessing this process, the world feels again that violence can never repress the advance of the working masses and reverse the trend of history.

The "Occupy Wall Street" demonstration is an inevitable result of historical development caused by the structural contradiction of capitalism.

Those protest actions, launched in capitalist countries under such slogans as "Occupy Washington", "Occupy Los Angeles", "Occupy Tokyo", "Occupy London Stock Exchange" and "Occupy Brisbane" are a mass struggle which erupted due to the extremely acute social and class contradiction whereby the rich get ever richer and the poor get ever poorer.

Such practice has reached the limit in developed capitalist countries.

Most of billionaires in the world, each with wealth of over billion U.S. dollars, are in those countries, and those who accounts for a small minority of global population have tremendous properties. On the contrary, the working masses accounting for the absolute majority live in abject poverty.

It is impossible to remove the social and class contradiction in capitalist society.

The governments of capitalist society pretend to show care for the people's life, talking about welfare policy but, in actuality, speak for interests of the capitalist class.

In capitalist society the state is immersed in debts due to war and aggression and the working people's life is going from bad to worse. However, in disregard of such situation capitalist billionaires are employing every trick to amass their private fortune and enjoy luxury.

The imperialist aggression and war policy is for profits of monopoly capitalists and emergency relief steps, taken at a time of cyclic economic crisis, are also for the capitalist class.

It is also the forces speaking for the bourgeois ruling class that have kicked up a sweeping campaign for merciless suppression of the working masses who turned out in the recent protest.

This structural contradiction results in ceaseless conflict in capitalist society.

The internal contradiction of the capitalist world can never be settled with violence.

November 4. 2011 Juche 100 Socialism Advances Full of Vigor and Energy

Pyongyang, November 4 (KCNA) -- General Secretary Kim Jong Il in his famous work "Socialism Is a Science" proved the truth and invincibility of socialism in an all-round way, saying that it is as alive as ever in the minds of the people.

He affirmed that socialism, the ideal and revolutionary banner of the popular masses struggling for independence, is sure to be revived and win in the end.

The scientific accuracy of his strong affirmation has been proved in practice.

Socialism is greeting a new heyday after dealing a heavy blow to capitalism.

More than 270 political parties are struggling to defend and advance the socialist cause under the banner of the Pyongyang Declaration.

It has become the irreversible main trend of the times to reject capitalism and aspire after socialism.

Social conversion from capitalism to socialism is taking place in Latin America which suffered much more damage by American-style "globalization" than other regions.

Absolute superiority of socialism over capitalism has been clearly proved in the revolutionary practice to overturn the old and create the new.

Socialists, working class, oppressed people and nations in different countries are holding aloft the banner of socialism, breaking the chain of capitalism.

The reality goes to prove that the trust of the world people in socialism is growing deeper.

Socialism has gained rich experience and lesson in the course of overcoming painful setback and ordeals and is advancing full of vigor and energy with the broader and firmer class foundation.

All the forces are aspiring after socialism, the forces protecting peace against war of aggression and advocating democracy, freedom, equality and justice and the forces loving the country and defending the people's right and interests.

The present era is that of a historical turn in which capitalism is itching close to the end and the world people are dynamically advancing along the road of independence and socialism.

Korean-style socialism centered on the popular masses, man-centered socialism, is the most scientific, advantageous and powerful one.

The history of modern Korea is that of victorious socialism in which the nation's dignity and sovereignty have been reliably defended in the do-or-die showdown with capitalism.

It is the miracle of history that the DPRK, which is standing in showdown with the U.S. imperialists in the crucible of acute confrontation between socialism and capitalism, could push forward socialist construction and bring about a turning phase of the grand advance for prosperity.

Peoples of many countries are struggling to revive the socialist movement with the firm resolve to take the road of socialism while looking up to the DPRK as the beacon of hope. This fact goes to prove it is right and proud that the DPRK carved out and has defended Korean-style socialism according to its faith and resolution no matter how and what others do. Anyone with discretion recognizes that the road chosen by the DPRK is right.

In the DPRK all the people are closely united as one on the basis of the revolutionary obligation and comradeship and help and lead each other forward on the principle of one for all and all for one.

This picture is unthinkable in capitalist society, and it is the highest pride of our society and the source of the Korean people's great happiness and invincible strength.

November 3. 2011 Juche 100 Future of Humankind Is Guaranteed under Socialism

Pyongyang, November 3 (KCNA) -- Socialism is greeting a new heyday after dealing a heavy blow to capitalism.

Historical turn has been made in which the scheme of the imperialists and reactionaries to stamp out socialism ended in smoke and socialism was revived and strengthened.

More than 270 political parties have struggled to defend and advance the socialist cause under the banner of the Pyongyang Declaration.

It has become a main trend of the times to reject capitalism and aspire after socialism.

Absolute superiority of socialism over capitalism has been clearly proved in the revolutionary

practice to overturn the old and create the new.

Socialists, working class, oppressed people and nations in different countries are holding aloft the banner of socialism, breaking the chain of capitalism.

The reality goes to prove that the more capitalism reveals its reactionary nature and weakness, the deeper the world people's trust in socialism grows.

The present era is that of historical turn in which the world people are dynamically advancing toward independence and socialism while capitalism is nearing its end.

Korean-style socialism centered on the popular masses, man-centered socialism, is the most scientific, advantageous and powerful one.

The history of modern Korea is that of victorious socialism in which the nation's dignity and sovereignty have been reliably defended in the do-or-die showdown with capitalism.

Great victory of Korean socialism--this is the main review of the century-long history of Kim Il Sung's Korea.

Future of humankind depends on socialism as a science.

November 2. 2011 Juche 100 Victory of Socialism Is Inevitable

Pyongyang, November 2 (KCNA) -- Rodong Sinmun Wednesday carries a by-lined article dedicated to the 17th anniversary of the publication of General Secretary Kim Jong Il's work "Socialism Is a Science".

The work, published on November 1, Juche 83(1994), comprehensively clarifies the absolute advantages of socialism over capitalism, the limitation of the preceding socialist theory, the originality of the Juche-oriented socialist theory and the inevitability of victory in Korean-style socialism centered on the popular masses.

If there are people, there is the idea of socialism and if socialism remains, independence and justice exist, the article says, stressing socialism is sure to emerge victorious as it is the independent desire of the people and their will.

Korean socialism represents a big family in which all its members are united in single mind. This family wins one victory after another thanks to the driving force of the Songun revolution which makes steady progress under the leadership of the party and the leader. Under this socialism the revolutionary principle of collectivism has been firmly adhered to in all fabrics of social life and the people's worthwhile life and happiness have been brought into full bloom thanks to the leader's politics of loving care and trust, it notes.

The driving force of the Korean revolution has grown stronger in every way since the historic Conference of the Workers' Party of Korea, it says, adding:

The army and the people have dynamically advanced toward a new victory of the Juche revolution while sharing the same thought and will with the headquarters of the revolution and keeping pace with them.

In the ongoing advance for a great surge the Korean people have boosted the comradely cooperation and unity at every unit and post under the slogan "One for All and All for One!", thus fully displaying popular heroism in socialist construction.

Absolute and steadfast are the support and confidence of the Korean people in the mother party which has created an epic of great loving care and devotion to the people under the slogan "We Serve the People!" despite the grave trials of history.

November 2. 2011 Juche 100 Occupy Melbourne Protesters March Peacefully in Australia

Pyongyang, November 2 (KCNA) -- More than 1,000 Occupy Melbourne protesters on Saturday marched on the Treasury Gardens in Melbourne of Australia.

The protesters marched peacefully with a colorful array of signs of banners writing "we are the 99 percent", in a move to express their views against corporate greed.

Copyright (C) KOREA NEWS SERVICE(KNS) All Rights Reserved.

November 1. 2011 Juche 100 Socialism Represents Future of Mankind

Pyongyang, November 1 (KCNA) -- It has been 17 years since General Secretary Kim Jong Il authored celebrated work "Socialism Is a Science" on November 1, 1994.

In the work, a great charter of scientific socialism in the present era, he proved the truth and invincibility of socialism in an all-round way, saying that it is as alive as ever in the minds of the people.

He affirmed that socialism, the ideal and revolutionary banner of the popular masses struggling for independence, is sure to be revived and win in the end.

The scientific accuracy of his strong affirmation has been proved in practice.

History is dynamically advancing along the road of victorious socialism indicated by him.

Towards the end of the last century the imperialists and reactionaries fussed about the "end" of socialism with regard to the events in some countries where capitalism was revived.

They even asserted historical "end" of socialism while advertising about "eternity" of capitalism.

But the new century shows the reality quite contrary to such assertion.

Capitalism, which is based on individualism and under which social relationship is mainly characterized by class antagonism and struggle, is now in the grip of the worst crisis, rejected everywhere in the world for its structural contradiction and reactionary nature.

It has found itself in more serious crisis since it sought "globalization" while clamoring about the "end" of socialism.

Neo-liberalism brought catastrophe and misfortune to various countries as it calls for "multi-party system" and "democracy" in politics and extreme liberalism and individualism in economy.

Financial liberalization pursuant to "globalization" stoked speculation and deepened financial crisis worldwide.

The U.S. and other capitalist countries of the West which pushed ahead with "globalization" are in the grip of its whirlpool.

Capitalism was revived with the U.S. imperialism as a core after the Second World War and elated in high spirit since the end of the Cold War. But it is now being shaken to its roots from its center.

The U.S. finds itself in the bottomless abyss of ruin due to the "war on terrorism" it called Third World War, just as the past fascist powers met self-destruction in the disastrous world wars against humanity.

The financial crisis which occurred in the U.S. is developing into the capitalist world crisis, sharpening class contradiction. The revolutionary advance of the oppressed working masses such as "Occupy Wall Street" demo is being intensified on a worldwide scale.

Financial supremacy, the last mainstay of U.S. imperialism, is on the point of collapse.

Illusion about the U.S. dollars has grown thinner.

The era is coming to an end when a minority of capitalist powers have exploited and plundered a majority of countries and peoples freely.

Internal contradiction and antagonism under capitalism are also getting serious.

The imperialists find a way out of the capitalist crisis in war, as evidenced by wars in Afghanistan, Iraq, Lebanon, Pakistan and other countries of the world.

Other Western powers are following in the road of ruin taken by the U.S. for "anti-terrorism war."

October 25. 2011 Juche 100 KCNA Slams U.S. Diplomatic Chief's Rigmaroles about DPRK's Human Rights Record

Pyongyang, October 25 (KCNA) -- The United States' accusations against the DPRK over its "human rights record" never cease.

The U.S. diplomatic chief was reported to have blustered recently that the DPRK "keeps abusing the rights of its inhabitants" and "the U.S. would continue strongly censure the north's threat."

This is another unpardonable infringement upon the sovereignty and dignity of the DPRK and a wanton violation of human rights and democracy.

Human rights precisely mean sovereign rights and vice versa.

It is a grave infringement upon sovereign rights and human rights abuses to deny the socialist system chosen and upheld by the Korean people and say this or that about it.

There are no "human rights issues" for us.

There can be no such things in the light of the intrinsic nature of the socialist system which serves the people, placing them in the center of everything.

It is none other than the U.S. that deserves accusation and condemnation over human rights.

The demonstrations which started in Wall Street are a manifestation of Americans' resentment at the U.S., the worst human rights abuser, and a judgment of it.

A countless number of people are groaning in pain and despair, left homeless as their houses have become objects of speculation.

403,000 people were newly registered as jobless throughout the U.S. for a week till October 15. This is indicative of the serious jobless problem.

The number of the poor reached 46.2 million last year, 2.6 million more than the previous year and the standard of Americans' living is the worst in decades.

Occurring in an unbroken chain are various crimes including gun-related crimes, theft and rape, etc. as the American society is governed by the jungle law based on individual selfishness.

Nowhere in the world is such country as the U.S. where people's right to live and right to existence are wantonly violated.

The U.S. is a tundra of human rights and a backward country in human rights record. It is the world's worst human rights abuser.

Guiltless people are falling victim to U.S. forces' attacks in Afghanistan, Iraq and Pakistan even at this hour.

It was GIs who committed sexual assaults against teenage school girls, sparking off great uproar in south Korea recently.

The U.S. is grossly violating the universally recognized international laws and a lot of innocent people are thrown behind bars without any trial on charges of "terrorism." They are used as guinea pigs of experiments on human bodies.

The world is now critical of the unethical crimes being committed by the U.S. as it is mercilessly violating the sovereignty of sovereign states under the pretext of "defence of human rights" and savagely destroying people's cradles and hurting their dignity.

The U.S. would be well advised to mind its own business before talking about somebody's "human rights record."

The "human rights diplomacy" aimed at infringing upon the DPRK's sovereignty and dignity can never go with dialogue.

October 19. 2011 Juche 100 History Proves Absolute Truth of Socialism

Pyongyang, October 19 (KCNA) -- The crisis of capitalism is getting more serious in all aspects.

The structural contradiction and moral taint of capitalist society, full of deception, fraud, hypocrisy and vanity, have been brought to light.

The financial crisis caused by the market economy of capitalism drives the world into uncontrollable confusion.

The working masses' struggle, staged against capitalism all at once across the world on Oct. 15

and 16, was the biggest organized one ever in the history of capitalism spanning more than 300 years.

Taking part in the struggle were millions of people from all walks of life in more than 1 500 cities in 80 odd countries.

The American protestors set October 15 as "day of international movement", calling on the working people the world over to respond to it.

In response to this call anti-capitalist demos took place all at once in Britain, Italy, Germany, Spain, France, Belgium, Australia, Japan, Philippines, Taiwan, etc. on October 15 and 16. The protestors contended that the blame for the capitalist economic crisis is on the greedy financial capital and corrupt politicians. They demanded final end to poverty and economic inequality, chanting such slogans as "Reject capitalism!" and "Give us jobs!"

In south Korea more than 400 civic and public organizations and workers' organizations launched protest, chanting "Occupy Seoul!"

These unprecedentedly big actions of the working masses against the exploiting classes in capitalist countries were attributable to the extremely acute socio-class contradictions created after the outbreak of the global financial crisis in 2007.

Various relief measures taken by the Western countries after the financial crisis were, in essence, for saving the big monopolistic capitals on the maw of bankruptcy. Those steps deepened concentration of capital only on big monopolistic enterprises while further deteriorating the life of the overwhelming majority of popular masses.

The capitalist market economy is now on the point of total bankruptcy, embroiled in a new financial panic by protracted economic crisis.

Stocks fell hard at the global financial markets, causing such serious upheaval as rise and fall in quotations of major currencies.

European banks, which bought national bonds issued by Eurozone countries suffering from the debt crisis, may reportedly sustain losses of 300 billion Euros in maximum.

As regards the gloomy monetary situation in Western countries the Organization for Economic Cooperation and Development predicted that the capitalist economy would not escape from the stagnation not only in 2011 but in 2012.

The only way out of the present crisis facing the capitalist world is to root out its system.

The Western countries can never get rid of the vicious cycle of crisis with any means as long as the capitalist market economy is left intact.

History never flows as wished by the imperialists and reactionaries.

Foreign media report that the shocking impact by financial and debt crisis is bringing to Europe's party politics and ideological trend of its society the most serious change since the end of the Cold War.

In Latin America many countries more strongly call for rejecting the capitalist market economy and taking to the road of socialism and leftist governments' influence is growing stronger with each passing day.

With the passage of time the capitalist corruptness and falsity are brought to bolder relief and illusion about capitalism vanishes like a bubble by the rapid current.

The idea reflecting the desire of humankind to live and develop in an independent way has become more vital. The truth of socialism is clearly evidenced in a new historic environment in the 21st century.

Socialism is the most scientific, just and worthwhile way that helps bear good fruition without fail.

As clarified by leader Kim Jong Il, socialism is a science.

The future of mankind is ensured by socialism based on science.

Copyright (C) KOREA NEWS SERVICE(KNS) All Rights Reserved.

November 2. 2009 Juche 98 KCNA on Sure Victory of Socialism

Pyongyang, November 2 (KCNA) -- 15 years have passed since General Secretary Kim Jong Il's famous work "Socialism Is a Science" was made public.

The vitality and validity of the work have been clearly proved in practice as it comprehensively testifies to the scientific accuracy and truth of socialism, the ideal of the popular masses aspiring after independence and a revolutionary banner.

When socialism collapsed in a number of countries at the end of the 20th century the imperialists and reactionaries claimed that socialism failed and its idea was wrong in a desperate bid to turn the world into a capitalist one.

They trumpeted that such a "globalization" would bring what they called "opportunity" and "prosperity".

But those countries which accepted it were thrown into a political mayhem and socio-economic catastrophe, forcing their peoples to suffer misfortune and pain.

The "globalization" advocated by capitalism faced a crisis and was snubbed in different parts of the world.

Entering the new century the imperialists sought a way out of the crisis in "anti-terror war," i.e. "globalization" of "liberal democracy" supported by military means.

This, however, has driven them into a more serious crisis.

The chaotic financial policy of the U.S. aimed at weathering the financial difficulties created by its "anti-terror war" only facilitated the collapse of the real estate market and deepened the financial crisis. This rapidly developed into worldwide economic crisis due to the economic "globalization".

The worldwide economic panic coupled with food, energy and environmental crises amidst the jungle law-dominated mayhem, a product of the "globalization" of capitalism, is more seriously threatening the existence of humankind than ever before.

Such a tragic situation foretells the end of individualism, liberalism and the capitalist "globalization" and the "end of the history" of the imperialist reactionaries.

The catastrophic consequences of the "globalization" of capitalism and its collapse after the demise of the Cold War are an inevitable product of the unpopular and brutal nature of capitalism.

This eloquently proves that capitalism based on individualism can never bring a genuine life, happiness and prosperity to the popular masses, and it tolls its death knell.

Latin American countries have emerged a strong force accelerating the revival of socialism, injecting fresh energy into the worldwide socialist movement.

The number of the countries aspiring after socialism including Venezuela, Bolivia, Nicaragua and Ecuador is on the steady increase in this region, inspired by the example set by Cuba.

They formed the ALBA, an organization for cooperation to accelerate the building of socialism against capitalism, while boosting the political, economic and military ties under the banner of independence against imperialism.

The member states of the ALBA are positively enforcing socialist policies such as the nationalization of energy resources and basic industries, land reform, free compulsory education and free medical care, achieving noticeable progress at a time when the capitalistic world is in the grip of financial and economic crises.

The stronger the attraction of socialism grows, the deeper the capitalist political and institutional crises get.

Louder voices concerned about the gloomy prospect of capitalism and confident of its collapse are heard from among media, religious and political circles in the capitalist countries.

It is an inevitable development of history that the society based on individualism is bound to be replaced by the one based on collectivism.

Immense are the pride and self-confidence, joy of life and creative enthusiasm of the army and the people in the DPRK who have steadfastly advanced along the road of socialism under the uplifted banner of Songun despite the imperialists' blatant challenge and abuses.

The DPRK, regarding socialism based on the Juche idea, the Songun idea, as an invincible treasured sword, is now dashing ahead towards a bright morrow, working miracles of history at a time when the world is suffering an upheaval.

The army and the people of the DPRK will surely emerge victors in the drive for building a thriving socialist nation true to the noble will of President Kim Il Sung and thus make the dignity and honor of Kim Il Sung's nation shine forever.

Copyright (C) KOREA NEWS SERVICE(KNS) All Rights Reserved.

October 20. 2005 Juche 94 Motive Power for WPK

Pyongyang, October 20 (KCNA) -- The Workers' Party of Korea has covered a long path replete with victory and glory, enjoying the absolute trust of the people over the last six decades. It is entirely thanks to the ideology and theory on building a revolutionary party expounded by President Kim Il Sung and leader Kim Jong Il in their famous works. Their famous works have been published in "Complete Collection of Kim Il Sung's Works", "Collection of Kim Il Sung's Works", "Collection of Kim Il Sung's Selected Works", "Collection of Kim Jong Il's Selected Works" and other collections of works. Among them are more than 1,000 works elucidating the revolutionary ideologies and theories on party-building in a scientific way.

They are encyclopedic works giving perfect answers to all theoretical and practical questions arising in party building and activities in the era of independence on the basis of the great Juche Idea.

First of all, they expound the WPK is the Juche-oriented revolutionary Party guided by the immortal Juche Idea. Many works including "Historical Experience of Building the Workers' Party of Korea" and "On the Fundamentals of Revolutionary Party Building" define the character and fighting goal of the Party and the principle and basic direction of its building and activities and give clear-cut answers to the theoretical and practical issues arising in the party building and activities.

It is the main ideology running through the works that the monolithic ideological system should be established and a unity and cohesion around leader achieved in the party.

Various works including "On Strengthening the Work of Establishing the Monolithic Ideological System of the Party amongst Cadres and the Work of Revolutionizing Them" and "Let Us Establish Firmer the Monolithic Ideological System in the Whole Party and Society" elucidate the issues relating to the law governing the Party building and activities such as establishing the monolithic ideological system, the basic line of the Party-building, ensuring the unity and cohesion in ideology, will, morality and obligation and the purity of the Party.

Meanwhile, many works propound the ideas of enhancing the leading role of the Party as the organizer and guide of all victories, realizing the unique Songun-based revolutionary leadership for the revolutionary Party, building it as a mass and motherly one, correctly solving the issue of succeeding to the revolutionary cause and carrying forward the cause of Party building generation after generation. Typical of them are "The Fundamental Way for Achieving Victory of the Revolution Is to Strengthen the Party and Increase Its Leadership Role", "For Carrying Forward and Accomplishing the Socialist Cause", "The Songun Revolutionary Line Is the Great Revolutionary Line In Our Times and the Ever-victorious Banner of Our Revolution", "Socialism Is a Science" and "The Workers' Party of Korea Is the Party of the Great Leader Comrade Kim Il Sung".

They also deal with the Party's policies on opposing invasion and occupation by foreign forces and achieving the unified development of the country and the nation and adhering to the independent line in its foreign policy, defending socialism.

The WPK, Kim Il Sung's Party has won a victory after victory, without any mistake in its lines or fiasco in the implementation of its policies by thoroughly embodying the ideologies and

theories on building a revolutionary Party put forward in the works in the party building and activities.
